

Making life easier\_

#### **About Tabitha**

When Tabitha became paralyzed from the waist down in 2014, her life changed dramatically. From running around in high heels, going to work and out and about with friends, she was suddenly confined to a wheelchair, dependent on people around her for help with everything.

A fiercely independent person by nature and used to living a very active life, Tabitha was terrified by the prospect of losing her independence. "How am I going to get around? How am I even going to live?" This was the beginning of a massive learning curve for Tabitha. But as she went through rehabilitation, she realized that even though you don't walk around on two legs, you can still do things. You just have to find new ways of doing them. "So I gave myself a stern talking to", she recalls. "I could either sit and cry about what I wasn't able to do. Or I could get on with life." Tabitha chose the latter – and intermittent self-catheterization (ISC) helped to make that possible.

She'd been discharged from the hospital with an indwelling catheter. But being attached to tubes and having a urine bag strapped to her body felt invasive, making her embarrassed and self-conscious. It was yet another reminder of what she couldn't do. The transition to a compact catheter was liberating. The fact that they are so discrete and easy to use, gave her the freedom and confidence to go out more. She regained control of her life in a way she hadn't seen coming.

From having no interest in competitive sports when she could walk, Tabitha started practicing wheelchair tennis. She now travels around the world competing in international tournaments, with several trophies and medals to show for her talent. This achievement is proof of what Tabitha now knows to be true: "that you can do what you want to do. You build your life." That's the spirit she hopes to inspire in others, by sharing her experience and talking openly about catheterization.

Tabitha has received compensation from Coloplast to provide this information. Each person's situation is unique so your experience may not be the same. Talk to your healthcare provider about whether this product is right for you.

# Welcome to Coloplast

Coloplast is a leader in the market within intimate healthcare. For more than sixty years, we've worked closely with healthcare professionals and users to develop products and services that make life easier for people with intimate healthcare needs.

Our Mission

Making life easier for people with intimate healthcare needs

# Making life easier

SpeediCath® catheters are prescribed for use for patients who require bladder drainage due to urine retention or post void residual volume (PVR). Before use, carefully read all of the instructions. Call your doctor if you think you have a UTI or can't pass the catheter into the bladder. For more information regarding risks, potential complications and product support, call Coloplast Corp. at 1-866-226-6362 and/ or consult the company website at www.coloplast.us. Caution: Federal law restricts this device to sale by or on the order of a physician.

Self-Cath® Plus Intermittent Urinary Catheters are intended for use in male or female patients requiring bladder drainage as determined by their physician. This device is indicated for those individuals unable to promote a natural urine flow or for those who have a significant volume of residual urine following a natural bladder-voiding episode. The device can be used by the patient once appropriate training has taken place or by a trained healthcare professional. Single-use only. See the device manual for detailed information regarding the procedure, contraindications, warnings, precautions, and potential complications/adverse events. For further information, call Coloplast Corp. at 1-866-226-6362 and/or consult the company website at www. coloplast.us. Caution: Federal law restricts this device to sale by or on the order of a physician.

Self-Cath® Intermittent Catheters are intended for use in male, female, and pediatric patients (neonates, infants, children, adolescents, and transitional adolescents) requiring bladder drainage as determined by their physician. This device is indicated for those individuals unable to promote a natural urine flow or for those individuals who have a significant volume of residual urine following a natural bladder-voiding episode. Single-use only. See the device manual for detailed information regarding the procedure, contraindications, warnings, precautions, and potential complications/adverse events. For further information, call Coloplast Corp. at 1-866-226-6362 and/or consult the company website at www.coloplast.us. Caution: Federal law restricts this device to sale by or on the order of a physician.

SureCath® Catheters are indicated for use by patients for intermittent catheterization for the purpose of bladder drainage. See the device manual for detailed information regarding the instructions for use, contraindications, warnings, precautions, and potential complications/adverse events. For further information, call Coloplast Corp. at 1-866-226-6362 and/or consult the company website at www.coloplast.us. Caution: Federal law restricts this device to sale by or on the order of a physician.

Folysil® Indwelling Catheters empty urine from the bladder through the urethra via a small cut through the abdomen above the pubic bone (suprapubic) during a surgical procedure. The choice of the size, balloon volume, and catheter material is the responsibility of your healthcare professional based on your condition and the length of time to be used. Coloplast's indwelling catheters are available by prescription only. Coloplast's indwelling catheters are for single-use only; discard it after use. If you experience symptoms of a urinary tract infection, are unable to pass urine, or the balloon will not deflate, contact your healthcare professional. The risk information provided here is not comprehensive. To learn more, talk to your healthcare professional to understand the risks and benefits to determine if Folysil is right for you. Although many patients benefit from the use of this device, results may vary. For further questions, call Coloplast Corp. at 1-866-226-6362 and/or consult the company website at www.coloplast.us.

Indication: The Peristeen® (Plus) Transanal Irrigation System is intended to instill water into the colon through a rectal catheter, which incorporates an inflatable balloon, inserted into the rectum to promote evacuation of the contents of the lower colon. The Peristeen Transanal Irrigation System is indicated for use by children (2 years - <12 years old), adolescent (12 years - < 18 years old), transitional adolescent (18 - <21 years old) and adult patients with neurogenic bowel dysfunction who suffer from fecal incontinence, chronic constipation, and/or time-consuming bowel management procedures.

Contraindications: Peristeen (Plus) Transanal Irrigation must not be used in the following situations: known anal or colorectal stenosis, colorectal cancer, radiotherapy to the pelvis, and recent abdomino-perineal surgery, active inflammatory bowel disease, acute diverticulitis, severe diverticulitis, previous diverticulitis and diverticular abscess, chronic symptomatic diverticular disease, within 3 months of abdominal, anal or colorectal surgery, within 4 weeks of endoscopic polypectomy, recent colonic biopsy, recent endoscopic mucosal resection (EMR) and recent endoscopic sub-mucosal dissection (ESD), severe autonomic dysreflexia, ischemic colitis, during spinal cord shock phase, complex diverticular disease, in patients who are pregnant and have not used the system before\*. Since the list is not exhaustive, the healthcare professional should always consider individual patient factors as well.

\*If the patient is pregnant and has never used transanal irrigation before, they should not start the irrigation procedure during pregnancy.

Warning: Peristeen (Plus) Transanal Irrigation procedure should always be carried out with caution. Bowel perforation is an extremely rare, but serious and potentially lethal complication to transanal irrigation and will require immediate admission to a hospital, often requiring surgery. See the device manual for complete user instructions, contraindications, warnings, precautions, and potential complications/adverse events. For further information, call Coloplast Corp at 1-855-605-7594 or consult the company website at www.coloplast.us. Caution: Federal law restricts this device to sale by or on the order of a physician.

# Ensure your patients get the product you recommend. Ask for SpeediCath® and Self-Cath® catheters by brand name.

Intermittent catheter users who have insurance can typically pay the same price when buying any catheter within the same category: straight tip,<sup>1</sup> coudé tip,<sup>2</sup> or catheter sets.<sup>3</sup>

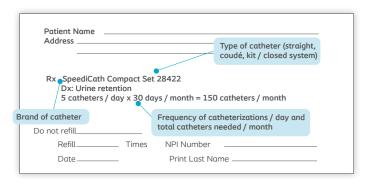

\* Dispense as written; exact language to specify brand dispensed varies by state. Contact your Coloplast Sales Rep or National Association of Boards of Pharmacy for more information.

Advise your patients to find a supplier who accepts assignment for the intermittent catheter. If your patients need assistance in finding a supplier, they may contact Coloplast Consumer Care at 1-866-226-6362.

#### Steps to consider for patients to get catheter they want:

1. Include the following information on each prescription:

2. Enroll your patients in Coloplast® Care

Call - contact Coloplast Care at 1-866-226-6362
Email - send request to care-us@coloplast.com<sup>4</sup>
Fax - send patient enrollment form to 1-855-676-2594
Website - www.ColoplastCareEnroll.com

Information from Coloplast® Care is for educational purposes only. It is not intended to substitute for professional medical advice and should not be interpreted to contain treatment recommendations.

- 1. HCPCS A4351 (straight)\*\*
- 2. HCPCS A4352 (coudé)\*\*
- 3. HCPCS A4353 (catheter set)\*\*
- 4. We recommend encrypting emails and forms if sending over email.

# Triple Action Coating Technology

#### **SpeediCath®**

All SpeediCath® catheters come with a unique hydrophilic coating, featuring our Triple Action Coating Technology. It consists of three strongly bonded elements, designed to protect the urethra in three ways:

#### Stays bonded

It stays bonded during insertion and withdrawal due to a proprietary base-coat that is covalently bonded to the catheter surface for an even coating without dry spots.

#### Stays smooth

It stays smooth because the polymer top-coat enables excellent water absorption for low friction, smooth insertion and reduced discomfort compared to uncoated catheters.

#### Stays hydrated

It stays hydrated with a special waterbased solution that swells the coating and makes it instantly ready to use.

#### SpeediCath® Standard

#### The world's first ready-to-use hydrophilic-coated intermittent catheter

Easy to carry, store and use. The catheter is pre-hydrated and ready-to-use, eliminating wait time. The hydrophilic coating is smooth and uniform, designed to minimize urethral friction compared to uncoated catheters. The eyelets are polished for comfort. The uncoated Grip Zone™ area is created to offer control in handling. This catheter is not made with natural rubber latex, DEHP or other phthalates.

#### SpeediCath® Standard

SpeediCath catheter only. No insertion supplies.

#### Straight Tip

#### SpeediCath® Soft

SpeediCath® Soft is designed to make catheterization simple and easy with fast preparation and a confident grip.

- Pre-lubricated intermittent catheter that is instantly readyto-use with a unique hydrophilic coating, eliminating the need for additional lubricants or waiting for a catheter to hydrate.
- Insertion grip made from a soft, flexible material designed to ensure a confident and hygienic grip of the catheter, without touching the tube or tip.
- Soft catheter that is easy to use the first time and every time
- This catheter is not made with natural rubber latex, DEHP or other phthalates.

#### SpeediCath® Soft

SpeediCath Soft straight tip intermittent catheter.

### SpeediCath® Compact Female and Compact Plus

The most compact, ready-to-use hydrophilic-coated intermittent catheters for women.

SpeediCath Compact Female and Compact Plus offer the benefits of our ready-to-use hydrophilic-coated intermittent catheters in a small, discreet package. Designed for women, the length of SpeediCath Compact Female matches the average length of the female urethra, and when unopened it is no longer than a tube of lipstick. This catheter is not made with natural rubber latex, DEHP or other phthalates.

20 www.coloplast.us 1-800-533-0464

Transanal irrigation with Peristeen is a well-documented bowel management technique that is effective at preventing fecal incontinence and chronic constipation for patients with neurogenic bowel dysfunction.

To learn more visit www.coloplastcare.us/bowel.

#### Peristeen® Transanal Irrigation

Peristeen is a FDA Class II cleared transanal irrigation system intended to instill water into the colon through a rectal catheter to promote evacuation of the contents of the lower colon. It is indicated for use by children (2 and up), adolescents, transitional adolescents and adults with neurogenic bowel dysfunction.

Peristeen is specially designed for portability and ease of use. It offers independence and a sense of security to the user. In clinical trials with patients with neurogenic bowel dysfunction, Peristeen system reduced fecal incontinence and constipation and improved quality of life.<sup>1,2</sup>

#### Peristeen® Transanal Irrigation Available through June 2022

29129	System without catheters	1 control unit / 1 water bag (with lid) / 2 straps
29122	Accessory unit Regular	15 rectal balloon catheters <b>Regular</b> / 1 water bag
29127	Accessory unit <b>Small</b>	15 rectal balloon catheters Small / 1 water bag

#### HCPCS A4459

Code

Manual pump enema system, includes balloon, catheter and all accessories, reusable, any type

A4459 would include 29129 (1 each) and either 29122 or 29127. Available via prior authorization process for Medicaid and private insurance.

HCPCS A4453 (effective 10/1/2021)

Rectal catheter for use with the manual pump operated enema system, replacement only

# Discover the difference of Biatain<sup>®</sup> dressings with 3DFit Technology™

Coloplast

Biatain foam dressings feature 3DFit Technology for optimal moist wound healing

#### Conforms to the wound bed

Upon contact with exudate, the unique foam conforms to the wound bed and reduces exudate pooling

#### Absorbs vertically

Microcapillaries go into action to absorb the exudate vertically and create optimal healing conditions

#### Retains exudate

Exudate is lockedaway and retained even under compression. reducing risk of leakage and maceration

Visit www.biatainsiliconeus.com to learn more

The Comfeel® Plus portfolio offers a range of dressings to manage and protect non- to moderately-exuding wounds.

- Exudate management with fewer dressing changes and less disruption to wound bed
- Specialty shapes and sizes for difficult-to-dress areas
- Color guide indicates best time to change dressing
- · Non-touch application system for ease of use
- · Not made with natural rubber latex; sterile

#### Comfeel® Plus Transparent Dressing (Thin)

- Comfortable, flexible hydrocolloid adaptable to wound and body contours
- Clear dressing and mapping grid allow for visual inspection without disturbing wound
- · Does not contain alginate

Code	Size	Units	HCPCS*
33530	2 x 2.75" (5 x 7 cm)	10	A6234
33533	4 x 4" (10 x 10 cm)	10	A6234

33539	6 x 6" (15 x 15 cm)	5	A6235

#### Comfeel® Plus Dressing

- Visual wound monitoring with mapping grid
- Contains alginate for enhanced absorption capacity

Code	Size	Units	HCPCS*
33146	1.5 x 2.5" (4 x 6 cm)	30	A6234
33110	4 x 4" (10 x 10 cm)	10	A6234
33115	6 x 6" (15 x 15 cm)	5	A6235
33120	8 x 8" (20 x 20 cm)	5	A6236

#### Comfeel® Plus Contour Dressing

- Butterfly-shaped hydrocolloid dressing for better conformity and adhesion
- Specifically designed for difficult-to-dress areas
- · Contains alginate for enhanced absorption

#### Comfeel® Plus Sacral Dressing

- Triangular-shaped hydrocolloid dressing designed for the sacral area
- · Contains alginate for enhanced absorption

Code	Size	Units	HCPCS*
33285	7 x 7" (17 x 17 cm)	5	A6235

#### Triad® Hydrophilic Wound Dressing

- Zinc oxide-based hydrophilic dressing absorbs moderate levels of wound exudate
- · Facilitates autolytic debridement
- Ideal alternative for difficult-to-dress areas
- · Not made with natural rubber latex; sterile

Code	Size	Units	HCPCS*
1964	2.5 oz. tube (71 g)	12	A6240
1967	6 oz. tube (170 g)	12	A6240

#### Sea-Clens® Wound Cleanser

- Saline-based solution for cleansing and irrigating acute and chronic wounds
- · No-rinse, isotonic, pH-balanced formula
- Easy-to-use spray bottle with SPRAY and STREAM setting with irrigation pressure

#### Woun'Dres® Collagen Hydrogel

- Rehydrates dry wounds and eschar
- Promotes moist wound environment and autolytic debridement
- · Not made with natural rubber latex

Code	Size	Units	HCPCS*
1166	1 oz. tube (28 g)	36	A6248
7690	3 oz. tube (84 g)	12	A6248

#### Purilon® Gel

- Sterile hydrogel with hydrating and absorbing properties to promote autolytic debridement
- · Maintains a moist wound environment
- · Contains alginate
- · Not made with natural rubber latex; sterile

Code	Size	Units	HCPCS*
3906	0.28 oz. (8 g)	10	A6248
3900	0.5 oz. (15 g)	10	A6248
3903	0.88 oz. (25 g)	10	A6248

#### Biatain® Contact

Biatain Contact is a one-sided silicone wound contact layer designed to protect wounds from secondary dressing changes.

- · Easy application and removal
- · Protects against in-growth
- Bigger pores for enhanced exudate transfer and reduced risk of pooling
- Improved transparency to facilitate wound assessment without removing the dressing

Code	Size	Units	HCPCS*
33560	2 x 3" (5 x 7.5 cm)	10	A6206
33561	3 x 4" (7.5 x 10 cm)	10	A6206

# A **scientifically** simple approach to skin care

For over 35 years, Coloplast has been dedicated to creating and providing high quality skin care products formulated with scientifically simple ingredients.

When patients and caregivers asked for cleaner, simpler products free of harmful ingredients, *Coloplast listened*. Today, we are proud to offer one of the most simplified and clean skin care product lines on the market.

### What does a scientifically simple skin care line mean?\*

NO	Parabens	YES	Hypoallergenic
NO	Formaldehyde-donors	YES	Neonate suitable
NO	Scents	YES	CHG compatible
NO	Alcohol or latex	YES	pH-balanced
NO	Dyes	YES	Non-sensitizing
		YES	Non-irritating
		YES	Fewer ingredients than leading competitors

<sup>\*</sup>Not all products in Coloplast's skin care line comply with these standards.

# Three **simple** steps to promote healthy skin

At Coloplast, we believe that a simplified, structured routine decreases variation in the delivery of care among staff and promotes compliance for optimal outcomes.

Coloplast has developed a unique skin care routine that includes three elements of care: Cleanse, Moisturize and Protect.

#### Cleanse

## To remove daily waste and environmental contaminants

Choose a cleanser that is mild, hypoallergenic and PHbalanced to match the acid mantle on the skin to minimize skin sensitivities, allergens and irritants.

#### Coloplast cleansers:

- EasiCleanse® Bath
- Bedside-Care® Foam or Spray
- Bedside-Care® Sensitive Skin Foam or Spray
- Gentle Rain® Extra Mild

#### Moisturize

#### To avoid skin complications

Choose a moisturizer without harmful ingredients like parabens and formaldehyde donors to avoid risk of skin complications.

#### Coloplast moisturizers:

- Sween® 24
- · Sween Cream®
- · Sween® Lotion
- Atrac-Tain<sup>®</sup> Cream

#### **Protect**

#### To avoid exposure to elements

Choose a skin protectant that has high quality ingredients to protect the skin from stool and urine, maintain skin hydration and help prevent skin maceration.

#### Coloplast protectants:

- Critic Aid® Clear
- Critic Aid® Paste
- Critic Aid® Clear Antifungal
- · Baza® Clear Ointment
- Baza® Protect Cream
- Baza Cleanse and Protect® Lotion
- Baza® Antifungal Cream

## Simple you can see

We make it simple for you to customize patient care with an array of easy-to-identify products.

#### Critic-Aid® Clear

#### Clear moisture barrier ointment

- · Clear moisture barrier
- · Minimal ingredients and preservative-free
- · Adheres to intact and eroded skin
- · Easy to apply and remove
- CHG compatible
- · Suitable for all ages including neonates1

Code	Size	Units
7565	4 g single application packet	300
7566	2.5 oz. (71 g)	12
7567	6 oz. (170 g)	12

#### Critic-Aid® Skin Paste

Thick moisture barrier paste

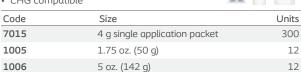

- · Thick, zinc oxide-based skin protectant
- Adheres to intact and moist, denuded skin
- Contains only 4 ingredients to help minimize potential skin irritation
- · CHG compatible
- · Suitable for all ages including neonates1

Code	Size	Units
1944	2.5 oz. (71 g)	12
1947	6 oz. (170 g)	12

#### Baza® Clear Ointment

Moisture barrier ointment

- · Clear, petrolatum-based moisture barrier
- · Enriched with skin conditioners
- · Contains 96% petrolatum
- Clear formulation makes it easy to visually assess the skin
- · CHG compatible

#### Baza® Protect Cream

#### Moisture barrier cream

- Enriched with skin conditioners
- CHG compatible

Code	Size	Units
1873	4 g single application packet	300
1877	2 oz. (57 g)	12
1880	5 oz. (142 g)	12

#### Baza Cleanse & Protect® Lotion

All-in-one perineal lotion

- · One step provides mild cleansing, a breathable barrier and moisturization
- · Available with odor control
- pH-balanced to help maintain the natural acid mantle of the skin
- · CHG compatible

Product	Code	Size	Units
Unscented	7710	4 g single application packet	300
	7712	8 fl. oz. (237 mL)	12
Scented	7725	8 fl. oz. (237 mL)	12

#### Sween® Body Powder

#### All-body powder

- Absorbs moisture and perspiration
- Non-talcum based formula
- · Helps reduce friction and prevent shearing

Code	Size	Units

Moisture-wicking fabric with antimicrobial silver

- Manages all four causes of intertrigo: moisture, friction and bacterial or fungal organisms in skin folds<sup>1</sup> and other skin-toskin and skin-to-device contact areas
- Manages the symptoms associated with intertrigo such as erythema, painful rash, denudement, satellite lesions and odor<sup>2</sup>
- Silver within the fabric provides effective antimicrobial action for up to 5 days

By targeting all four causes of Intertrigo, InterDry is clinically proven to provide complete, cost-effective relief within 5 days for as little as \$5<sup>3</sup>.

0089	Holds 21 fl. oz. (621 mL)	12

Making life easier\_

## Through BodyFit Technology, we offer a secure fit to real bodies to help prevent leakage and skin issues

Leakage and skin issues are closely related challenges. The right fit helps prevent both.

Leakage

## 76%

of people with a stoma have experienced leakage within the last six months.1

## Leakage

is often caused by a poor fit to the body.2

Skin issues

### Skin issues

There is a significant correlation between leakage frequency and the severity of the peristomal skin condition.2

### 61%

of users attributed their most recent skin issue to leakage under the barrier 3

# The #1 ostomy brand in the world, **SenSura® Mio,** is now Extended Wear\*!

To learn more, visit us at www.sensuramio.us or call 1-888-726-7872.

SenSura Mio was designed to fit individual bodies – and now, a recent 2,359-patient survey demonstrated that SenSura Mio users report less leakage onto their clothes than other extended wear products, while experiencing similar or even longer wear time using SenSura Mio<sup>1</sup>.

While SenSura Mio was initially launched into the standard wear category, recent user experience<sup>1</sup>, clinician evaluation<sup>2</sup>, and lab-based data<sup>3</sup> reinforces SenSura Mio's performance as an extended wear product.

With this change, users who need or would prefer an extended wear product will now have access to SenSura Mio's unique technology, designed to reduce the worry about leakage & provide a comfortable fit:

- Full-circle filter to reduce ballooning
- · Discreet neutral-gray, soft woven textile
- Wide outlet
- A flexible fit, thanks to BodyFit Technology, an elastic adhesive that is unique in all SenSura Mio barriers.

<sup>\*</sup>Excluding 1-piece closed-end pouches

Ostomy pouch user survey, 2021, n=2,359. Dataset collected by Coloplast but includes all brands. Data on file.

<sup>2.</sup> Product evaluation of SenSura Mio Convex, 2016, n=98 clinicians.

<sup>3.</sup> Data from 48h bench testing performed by Coloplast; may not be indicative of clinical performance. Data on file.

# Security to live everyday life

# **Brava®**supporting products

For customizing pouching system fit and for issues such as leakage and skin irritation.

### NEW! Brava® Protective Seal Convex

The new Brava Protective Seal Convex is designed to protect the skin against leakage for flush or retracted stomas and

patients with folds, creases or scarring around their stoma.

#### Brava® Protective Seal

- · Easily shaped
- · Leaves minimal residue behind
- Follows body movements
- Significantly reduces leakage compared to competitor rings\*

The Brava® Ostomy Support Belt brings relief by relieving the heavy sensation of hernias.

- Comfortable and breathable fabric
- Stretchable to fit body contours
- Easy-to-use pocket closure
- Silicone grip to prevent sliding and rolling

<sup>\*</sup>Based on bench test data. May not be indicative of clinical performance.

## Think again. Think Brava®

Designed to address leakage and care for your skin.

#### Brava® Elastic Barrier Strips

Skin-friendly strips are used to "picture frame" around an ostomy barrier, designed for extra security.

- Elastic (follow the contours of the body)
- Ensure the position of the barrier and designed to minimize roll-up
- Skin-friendly and secure alternative to tape
- · Not made with natural rubber latex

#### Brava® Elastic Barrier Strips- Curved For round or oval barrier shapes

#### Brava® Moldable Ring

Designed for dual-action leakage reduction - used to fill in uneven skin surfaces and protect the skin.

- Molds and adheres securely to dips, creases, and folds to help create a tight seal around the stoma
- Helps keep skin healthy by protecting it from output and absorbing moisture from the skin
- Easy to handle, mold and apply
- Alcohol-free and sting-free
- · Not made with natural rubber latex

Code	Size	Units	HCPCS*
120307	2 mm (thin)	10	A4385
120427	4.2 mm (thick)	10	A4385

#### Brava® Strip Paste

Pectin-based product that protects peristomal skin.

- Protects peristomal skin from stoma output
- Used to fill uneven skin surfaces to create a flat pouching surface
- · Alcohol-free and sting-free
- Not made with natural rubber latex

Code	Size	Units	HCPCS*
26555	2 oz. total package (.2 oz. per strip)	10 strips	A4406

#### Brava® Paste

A sting-free alternative to conventional alcohol-based paste.

- Creates a tight, effective seal between peristomal skin and the ostomy/fistula appliance
- No alcohol = no need to "set"; contains pectin
- Not made with natural rubber latex

Code	Size	Units	HCPCS*
12050	2 oz.	1	A4406

#### Coloplast® Paste

Used to fill in uneven skin surfaces to create a flat pouching surface.

- · Provides tight sealing around the stoma
- · Protects against stoma output, minimizing risk of maceration
- Low alcohol content; no pectin
- Not made with natural rubber latex

Code	Size	Units	HCPCS*
2650	2 oz.	12	A4405

#### Brava® Skin Cleanser Wipes

The wipe that cleans and cares. A convenient way to cleanse and maintain healthy skin when changing the ostomy pouching system.

- · Contains ProVitamin B5 to provide a soothing and moisturizing effect
- · Does not contain alcohol or perfumes
- No residue left on the skin that could affect barrier adhesion
- Not made with natural rubber latex

Code	Size	Units	HCPCS*
12080	1 wipe	15 wipes/pack	A9286**

#### Brava® Lubricating Deodorant

A pouch lubricant + deodorizer in one. Powder-fresh liquid neutralizes odor and allows output to slide to the bottom of the pouch for easier emptying.

Code	Size	Units	HCPCS*
12060	.25 fl. oz. (7.5 mL) sachet	20 sachets	A4394
12061	8 oz. bottle	16	A4394

#### Brava® Adhesive Remover Spray

- Designed to lift the edges of the barrier for ease in removal
- Dries within seconds without leaving an oily residue behind
- · Alcohol-free, silicone-based, and sting-free
- Not made with natural rubber latex

#### Brava® Adhesive Remover Wipes

- · Wipe away adhesive residue
- · Dries within seconds without leaving an oily residue behind
- · Alcohol-free, silicone-based, and sting-free
- Not made with natural rubber latex

Code	Size	Units	HCPCS*
120115	1 wipe	30 wipes/box	A4456**

#### Brava® Skin Barrier Spray

- · Protects against stoma output and adhesives
- Dry within seconds without building a thick or tacky layer
- · Alcohol-free, silicone-based, and sting-free
- Not made with natural rubber latex

#### Brava® Skin Barrier Wipes

- · Protects against stoma output and adhesives
- Dry within seconds without building a thick or tacky layer
- Tip: wring the wipe like a wet rag to expel the liquid, then wipe to disperse on skin

- Alcohol-free, silicone-based, and sting-free
- · Not made with natural rubber latex

Code	Size	Units	HCPCS*
120215	1 wipe	30 wipes/box	A5120**

#### Brava® Protective Sheet

Hydrocolloid skin barrier that protects the skin from stoma output.

- Offers effective protection for peristomal skin and "3-way stretch"
- $\bullet$  Provides a ready surface for good adhesion
- · Adheres to moist skin
- Not made with natural rubber latex

• NOT III	ide with hatarat rubber late.

# 2-piece Click

(Mechanical coupling)

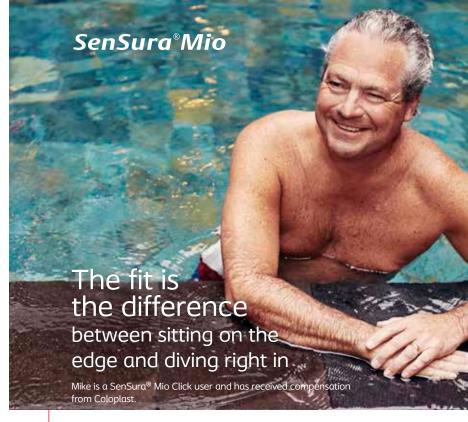

Pouch can be repositioned while it's still on the body

Tactile experience of pressing two pieces together can be reassuring

Lock ring gives an audible cue that it's securely locked

### SenSura® Mio Click

BodyFit Technology is an elastic adhesive barrier found in all SenSura® Mio Barriers. This unique barrier quickly adheres to the skin, flows into creases and folds, is highly stretchable, and flexes with the body. This may help prevent channels and gaps and may result in reducing leakage and skin issues.

NOTE: SenSura® Mio Click is NOT compatible with SenSura® Click or Assura® systems.

#### **Urostomy**

SenSura® Mio Uro

Wide anti-reflux valves support varying ways of managing stents:

- Stents threaded into a pouch connected to a night drainage bag
- Rolling the stents in the top of the pouch, making a loop
- Stents that have been cut

Welded "multi-chambers" minimize ballooning

Wide anti-reflux valves

#### SenSura® Mio Click MAXI Urostomy Pouch

- · Multi-chambers minimize sloshing
- Wider anti-reflux valves prevent urine from washing over the stoma
- Soft outlet can be connected to urostomy night bag #21365 or any standard night bag
- Neutral gray, water-resistant textile
- Not made with natural rubber latex

#### Urostomy Night Bag and Bag Hanger

See Accessories page 72 for more information.

## 2-piece Flex

(Adhesive coupling)

Flexible system bends with body movements

The low profile of a 1-piece – the convenience of a 2-piece

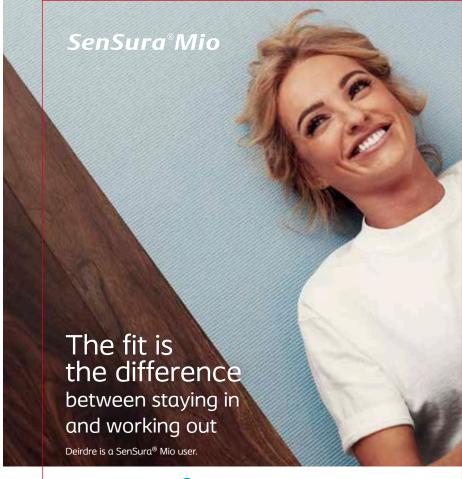

Floating flange = minimal pressure to apply

Built-in security channel + strong adhesive = strong leakage reduction

## SenSura® Mio Flex

The BodyFit Technology in all SenSura Mio barriers combines an elastic adhesive, that bends and stretches with the body, with an innovative barrier designed to provide a secure and comfortable fit.

NOTE: SenSura® Mio Flex and SenSura® Flex **are compatible** with one another

#### SenSura® Mio Flex Flat Barrier

- · Extended wear
- · Not made with natural rubber latex

# Download the Coloplast Stoma Care App

# Designed with nurses in mind

#### Features:

- 1. Easy access to Coloplast® Care
- 2. BodyCheck™ Assessment
- Step-by-step guides with how-to-use videos
- Common problems and recommended actions
- 5. General information on urostomies, ileostomies and colostomies

# Download the Coloplast Stoma Care app now!

Search for "Stoma Care" in the App Store and Google Play to download for free today.

# Hospital Assortment

Elastic adhesive fits over folds and contours, yet remains securely in place

Two outlet types for different options:

- Soft (for liquid stool; fits standard drain bags)
- Tap (for thicker output; fits fecal drain bag with wide-lumen tubing)

Printed measurement scale on post op pouches helps visually track output volume

# Security and comfort from hospital to home.

Your patients deserve all the benefits of SenSura® Mio from day one.

Getting used to a stoma is challenging enough without the added complexity of having to learn a different pouching system. Why not give your patients the security and comfort of Mio - right from the start? Options are available in different sizes, outlet types, and coupling systems to meet patient needs.

2-piece Click Soft | Tap \*Also available in smaller size!

2-piece Flex Soft | Tap

1-piece Soft Available in flat, soft convex, and light convex!

Post Op with window Soft Sterile | Non-Sterile

#### **High Output Pouches**

#### SenSura® Mio Click High Output Pouch with Soft Outlet

- Special full-circle filter designed specifically for ileostomy output
- · Neutral gray, water-resistant textile
- Transparent pouches feature a printed scale for visual indication of output volume
- · Opaque pouches feature a peek-a-boo inspection window and tuck-away option to keep the outlet from rubbing on the wearer's leg
- drain bag or Coloplast fistula drain bag #14010

#### Extra Protection

#### Brava® Elastic Barrier Strips

Skin-friendly strips are used to "picture frame" around an ostomy barrier, providing extra security.

- Elastic (follow the contours of the body)
- Ensure the position of the barrier and minimize roll-up
- · Skin-friendly and secure alternative to tape
- · Not made with natural rubber latex

#### Brava® Elastic Barrier Strips- Curved For round or oval barrier shapes

Code	Size	Units	HCPCS*

12033	1 1/8"	3"	2.5 mm	Extra wide (15/16")	10	A4385

Moldable barrier ring designed to provide convexity for flush or retracted stomas.

- High-tack adhesive that adheres quickly to the skin, filling small creases, folds, or scarring around the stoma
- Erosion resistant composition
- High flexibility to maintain seal during body movement
- · Steep sides designed to provide convexity to peristomal area
- Thin edges fit snugly around peristomal area
- · Not made with natural rubber latex

Code	Stoma size	Thickness	Units	HCPCS*
12090	3/4"	8.2mm	10	A4411
12091	1"	8.2mm	10	A4411
12092	1 3/16"	8.2mm	10	A4411
12093	1 3/8"	8.2mm	10	A4411
12094	1 9/16"	8.2mm	10	A4411
12095	13/4"	8.2mm	10	A4411

#### Brava® Moldable Ring

Designed for dual-action leakage reduction - used to fill in uneven skin surfaces and protect the skin.

- Molds and adheres securely to dips, creases, and folds to help create a tight seal around the stoma
- Helps keep skin healthy by protecting it from output and absorbing moisture from the skin
- Easy to handle, mold and apply
- · Alcohol-free and sting-free
- · Not made with natural rubber latex

Code	Size	Units	HCPCS*
120307	2 mm (thin)	10	A4385
120427	4.2 mm (thick)	10	A4385

#### Brava® Strip Paste

Pectin-based product that protects peristomal skin.

- · Protects peristomal skin from stoma output
- Used to fill uneven skin surfaces to create a flat pouching surface
- · Alcohol-free and sting-free
- Not made with natural rubber latex

#### Brava® Paste

A  $\mbox{sting-free}$  alternative to conventional alcohol-based paste.

- Creates a tight, effective seal between peristomal skin and the ostomy/fistula appliance
- No alcohol = no need to "set"; contains pectin
- Not made with natural rubber latex

Code	Size	Units	HCPCS*
12050	2 oz.	1	A4406

#### Coloplast® Paste

Used to fill in uneven skin surfaces to create a flat pouching surface.

- · Provides tight sealing around the stoma
- · Protects against stoma output, minimizing risk of maceration
- · Low alcohol content; no pectin
- · Not made with natural rubber latex

#### Brava® Skin Cleanser Wipes

The wipe that cleans and cares. A convenient way to cleanse and maintain healthy skin when changing the ostomy pouching system.

- Contains ProVitamin B5 to provide a soothing and moisturizing effect
- · Does not contain alcohol or perfumes
- No residue left on the skin that could affect barrier adhesion
- · Not made with natural rubber latex

Code	Size	Units	HCPCS*
12080	1 wipe	15 wipes/pack	A9286**

#### Brava® Lubricating Deodorant

A pouch lubricant + deodorizer in one. Powder-fresh liquid reduces odor and allows output to slide to the bottom of the pouch for easier emptying.

• Not made with natural rubber latex

Code	Size	Units	HCPCS*
12060	.25 fl. oz. (7.5 mL) sachet	20 sachets	A4394
12061	8 oz. bottle	16	A4394

#### Brava® Adhesive Remover Spray

- Designed to lift the edges of the barrier for ease in removal
- Dry within seconds without leaving an oily residue behind
- · Alcohol-free, silicone-based, and sting-free
- Not made with natural rubber latex

Code	Size	Units	HCPCS*
120105	1.7 oz. (50 mL)	1	A4455**

#### Brava® Adhesive Remover Wipes

- Wipe away adhesive residue
- Dry within seconds without leaving an oily residue behind
- · Alcohol-free, silicone-based, and sting-free
- · Not made with natural rubber latex

#### Brava® Skin Barrier Spray

- Protects against stoma output and adhesives
- Dry within seconds without building a thick or tacky layer
- Alcohol-free, silicone-based, and sting-free
- · Not made with natural rubber latex

Code	Size	Units	HCPCS*
120205	1.7 oz. (50 mL)	1	A4369**

#### Brava® Skin Barrier Wipes

- · Protects against stoma output and adhesives
- Dry within seconds without building a thick or tacky layer
- Tip: wring the wipe like a wet rag to expel the liquid, then wipe to disperse on skin
- · Alcohol-free, silicone-based, and sting-free
- · Not made with natural rubber latex

# **BodyCheck™**

Identifying ostomy solutions based on individual needs

Together with 300 Wound, Ostomy, Continence (WOC) nurses, we've developed BodyCheck™ body profile assessment which uses Body Profile Terminology, a common language to describe the peristomal body profile.

Assess your patient's overall peristomal area as a Regular, Inward, or Outward

Visit www.bodycheck.coloplast.us to complete the assessment

3 Receive personalized ostomy solutions (may include accessory options)

Visit www.bodycheck.coloplast.us

# Making life easier\_

### For little fighters

Babies and kids present different pouching challenges than adults - so we've applied **BodyFit Technology** to develop specific solutions for different stages in a child's life.

### Ask us about our pediatric education!

#### Pediatric FAQ

A quick tipsheet with answers to frequently asked questions, like "what do I do if friends and family - or other kids - have questions?"

and "what do I do if my child pulls the pouch off?"

Caregivers can request this via our Coloplast® Care program.

#### My Child Has An Ostomy: A Resource Sheet for Caregivers

A fill-in-the-blank sheet to help parents communicate about their child's needs to

day care providers, school nurses, and other caregivers.

Caregivers can request this via our Coloplast® Care program.

# **Life After Your Child's Ostomy**A high-level

A high-level overview of anatomy, how to change a pouch, pouching system options, where to get

supplies, dietary notes, and other information in English or Spanish. Caregivers can request this via our Coloplast® Care program.

#### When I Met Tipster: A coloring book for children with ostomies

A simple coloring book to help kids engage with their ostomy surgery and

"new normal" - or learn more about a sibling's ostomy.

Available to hospitals via Colonlast

Available to hospitals via Coloplast sales representatives, or to caregivers via our Coloplast® Care program.

#### Jake Gets a Stoma

A children's book written by Jake's mom, who wanted a better way to explain

the surgery and stoma management to her son and other kids going through the same thing.

Available to hospitals via Coloplast sales representatives, or to caregivers via our Coloplast® Care program.

#### SenSura® Mio Bunny

Coloplast offers a complimentary training bunny for product education use with both SenSura® Mio

Baby & Kids. Contact your sales representative for more information.

Limitations apply. The SenSura® Mio bunny is provided to healthcare providers to offer to families for teaching purposes only and should only be used with Coloplast products.

### Teen Life with an Ostomy

Navigating school, what to wear, and hanging out with friends aren't covered by the average adultoriented materials -

that's why we're so excited to feature tips from Paige, a teen who's been through it all!

Available to patients via our Coloplast® Care program.

Information from Coloplast Care is for educational purposes only. It is not intended to substitute for professional medical advice and should not be interpreted to contain treatment recommendations. You should rely on the healthcare professional who knows your individual history for personal medical advice and diagnosis.

#### SenSura® Mio Baby

2-piece pouching system designed with BodyFit Technology to tackle the challenges of preemies and babies from 30 weeks of gestation to 6 months of age.

#### SenSura® Mio Baby Flex 2-Piece Barrier

- · Oval barrier accommodates one or multiple stomas
- No starter hole custom cut
- · Gentle adhesive sticks securely and removes gently with Brava® Baby Adhesive Remover
- · Soft flange enables the pouch to be removed and replaced
- Sterilized surface, single-packed
- · Not made with natural rubber latex

Cut-to-fit			Units: 5
Code	Stoma Size	Color	HCPCS*

Coloplast® Care is the only manufacturer-provided patient support program with better patient outcomes supported by peer-reviewed data.

#### About the team

Coloplast® Care Advisors assist patients with their intimate healthcare needs. They are available Monday through Friday from 7 a.m. to 7 p.m. (CT). The team offers one-onone assistance for the following:

#### Quality of life guidance

Our team can answer questions regarding product lines, routines that will fit their lifestyle, and encourage self-assessments for ongoing wellness support.

#### Connecting to the care network

Coloplast Care can help locate a medical supplies dealer in-network with your patient's insurance to ensure that they have access to the correct products.

#### **Community resources**

Coloplast Care Advisors also provide awareness of resources in communities where your patients live, such as support groups, events, or conferences. The Advisors can also offer free samples\*, if needed, from the Coloplast ostomy and continence product lines.

For ostomy: visit www.ostomy.coloplastcare.us or call 1-877-858-2656 to enroll your patients today.

For continence: visit bladder.coloplastcare.us or call 1-866-226-6362 to enroll your patients today.

For Peristeen® inquiries, visit coloplastcare.us/bowel or call 1-855-605-7594 for more information.

\*Limitations apply. SpeediCath®, Self-Cath® and SureCath® catheters are available by prescription only. Samples are not available for Peristeen.

### Coloplast® Professional

#### Coloplast Professional is a

comprehensive program that suits a variety of learning needs and provides

ongoing support to deliver best-in-class education training, and resources.

#### **Product** Training

This hands-on training program is tailored to your staff and your schedule to establish proper product usage and compliance to protocols. Coloplast provides product training at implementation and as needed to meet your needs.

#### **Expert** Education Programs

A Coloplast Clinical Consultant or Key Opinion Leader in the field of wound and skin care will provide a live learning experience at your facility, offsite, or via webinar. Learn best practices while sharing experiences with colleagues.

#### **Online** Learning

Coloplast HEAL is an online education program that offers CE credits for healthcare professionals. The program aims to expand knowledge of modern wound healing principles and improve the standard of care for patients. To learn more and register, visit www.coloplast.us/professional

#### Facility-led Education

This train-the-trainer program will provide expertise and materials to key individuals in your organization so they can drive education across the organization. Materials provided include presentations, training tools, and more to help you facilitate a meaningful training experience.

To learn more about the education programs offered by Coloplast, contact Customer Service at 1-800-533-0464.

The information in this document is informational only, general in nature, and does not cover all payers' rules or policies. This information was obtained from third party sources and is subject to change without notice as a result of changes in reimbursement regulations and payer policies. This document represents no promise or guarantee by Coloplast Corp. regarding coverage or payment for products or procedures by CMS or other payers. Providers are responsible for reporting the codes that most accurately describe the patient's medical condition, procedures performed and products used. Providers should check Medicare bulletins, manuals, program memoranda and Medicare guidelines to ensure compliance with Medicare requirements. Inquires should be directed to the appropriate other payer for non-Medicare coverage situations.

#### Medicare Utilization - Continence Care

Usual maximum limits for some products from the Medicare Local Coverage Determinations (LCD) are shown below. Suppliers should examine their applicable Medicare contractor policies for full examination of policy requirements, including medical necessity and documentation.

HCPCS*	Long Description	Usual Maximum
A4310	Insert tray without drainage bag and without catheter (accessories only)	1 insertion tray per episode of indwelling catheter insertion
A4332	Lubricant, individual sterile packet, each	200/month
A4349	Male external catheter, with or without adhesive, disposable, each	35/month
A4351	Intermittent urinary catheter; straight tip, with or without coating (Teflon, silicone, silicone elastomer, or hydrophilic, etc.), each	200/month
A4352	Intermittent urinary catheter; Coudé (curved) tip, with or without coating (Teflon, silicone, silicone elastomer, or hydrophilic, etc.) each	200/month
A4353	Intermittent urinary catheter, with insertion supplies	200/month
A4357	Bedside drainage bag, day or night, with or without anti-reflux device, with or without tube, each	2/month
A4358	Urinary drainage bag, leg or abdomen, vinyl, with or without tube, with straps, each	2/month

Usual Maximum

### Medicare Utilization - Ostomy

**HCPCS\*** Short Description

Usual maximum limits for some products from the Medicare Local Coverage Determinations (LCD) are shown below. The amount of ostomy supplies varies by patient based on the type of ostomy, its location, its construction, and the condition of the peristomal skin. The table below shows the maximum number of items that are usually medically necessary for patients with ostomies. It may be more or less depending on the factors that affect the frequency of barrier and pouch change. The medical necessity for a greater quantity of supplies must be clearly documented in the patient's medical record (physician's signed and dated order).

TICI CO	Short Description	OJUUL WAXIIIIUIII
A4357	Bedside drainage bag	2 ea/month
A4361	Ostomy faceplate, each	3 ea/6 months

## Medicare Utilization - Wound Care

Usual maximum limits from the Medicare Local Coverage Determinations (LCD) are shown below. Suppliers should examine their applicable Medicare contractor policies for full examination of policy requirements, including medical necessity and documentation.

HCPCS*	Short Description	Usual Maximum
A6196	Alginate dressing ≤ 16 sq. in.	1/day
A6197	Alginate dressing > 16 ≤ 48 sq. in.	1/day
A6199	Alginate dressing wound filler, per 6 inches	1/day
A6203	Sterile composite dressing, $\leq$ 16 sq. in. with border	3/week
A6204	Sterile composite dressing $>16 \le 48$ sq. in. with border	3/week
A6206	Sterile contact layer, $\leq$ 16 sq. in.	1/week
A6207	Sterile contact layer $> 16 \le 48$ sq. in.	1/week
A6209	Sterile foam dressing ≤ 16 sq. in. without border	3/week
A6210	Sterile foam dressing $> 16 \le 48$ sq. in. without border	3/week
A6211	Sterile foam dressing > 48 sq. in. without border	3/week
A6212	Sterile foam dressing ≤ 16 sq. in with border	3/week
A6213	Sterile foam dressing $> 16 \le 48$ sq. in. with border	3/week
A6234	Sterile hydrocolloid dressing $\leq$ 6 sq. in. without border	3/week
A6235	Sterile hydrocolloid dressing $> 16 \le 48$ sq. in. without border	3/week
A6236	Sterile hydrocolloid dressing > 48 sq. in. without border	3/week
A6237	Sterile hydrocolloid dressing $\leq$ 16 sq. in. with border	3/week
A6238	Sterile hydrocolloid dressing $> 16 \le 48$ sq. in. with border	3/week
A6240	Sterile hydrocolloid dressing filler, paste, per ounce	3/week
A6248	Hydrogel dressing, wound filler, gel, per fluid ounce	3 fl. oz. per wound/30 days
A6251	Sterile specialty absorptive dressing, wound cover, ≤ 16 sq. in. without border	1/day
A6252	Sterile specialty absorptive dressing, wound cover, $> 16 \le 48$ without border	1/day
A6260	Sterile wound cleanser, any type/size	Not covered under the surgical dressing benefit

# Making life *easier*

## **Patient Education Resources**

Scan here to enroll your patients into the Coloplast® Care program

HCP Login (coloplastcareconnect.us)

Scan here for ostomy patient education resources including How-To videos.

From going to the grocery store to biking up a mountain, users' hopes and aspirations fuel our passion of finding new ways to help make their lives easier.

We constantly question the status quo across every aspect of intimate healthcare and seek to understand our users, to better anticipate and advocate for their needs. Ever since the founding of Coloplast in 1957, we have worked closely with healthcare professionals and the users of our products to discover new solutions as well as new ways to create solutions that are sensitive to their special needs. Together, we move care forward.

Our business includes Ostomy Care, Continence Care, Wound & Skin Care and Interventional Urology. We operate globally and employ about 13,000 employees.
