Take Control of Stress Urinary Incontinence

STRAIGHT Talk

The information in this guide is not intended to replace any discussion with your doctor, or any of the materials he or she may give you. By taking the time to read this guide, you have already taken an important step towards correcting your incontinence and restoring the active lifestyle you've always enjoyed.

Acknowledgment

Coloplast would like to acknowledge and thank Matthew E. Karlovsky, M.D., for his partnership in the development of the information provided in this brochure.

Insurance coverage

In most cases, Medicare and private insurance plans cover sling procedures. Consult with your insurance carrier before seeing your physician to find out the specific criteria for coverage. The reimbursement specialist at your doctor's office may also be able to help with this.

Returning to an active lifestyle

Many women find it difficult to talk about incontinence due to potential embarrassment about the subject or the intimate nature of the problem. There are many options for treating or managing incontinence and it is important to discuss all of the options with your doctor.

By treating your incontinence successfully, you are getting back in control and are free to return to the active lifestyle you have always enjoyed.
